

Autumn in Year 3

Our Autumn Topic

The UK

As geographers...

We will deepen our understanding of the key geographical characteristics of the United Kingdom and learn how England is divided into regions and counties. We will investigate how different types of settlements vary and will explore both the human and physical features of the UK, as well as those of our local area

As historians...

We will learn about British prehistory from the Stone Age to the Iron Age, including changes to people and lifestyle caused by ingenuity, invention and technological advancement

Trips

We are planning a trip to St Paul's Church for the children to explore our local area as well as apply knowledge of symbols and keys in maps. We will have the opportunity to develop the sketching skills learnt in our art lessons.

As scientists...

We will learn about the importance of nutrition for humans and other animals. We will identify the role of a skeleton and muscles and identify animals with different types of skeletons through setting up tests, observations, recording data and evaluating.

As individuals and part of society...

We will learn about physical and mental health, emotions and self-care by exploring healthy habits and managing feelings. We will explore friendships, families and online relationships through discussion and reflection.

As athletes...

We will develop fundamental movement skills and apply them to help develop the skills required in a range of games and activities, including basketball, netball, football, hockey and tennis.

As theologists...

We will explore the history of harvest celebrations, their significance and associated traditions from a variety of worldviews.

As musicians...

Our learning in this term will be focused around one song: Hands, feet, heart. We will learn to listen and appraise as well as compare and contrast this song with other classic rock songs.

As computer technicians...

We will develop our understanding of digital devices. We will also compare digital and non-digital devices. Then we will identify computer networks, such as wireless access points and switches.

As artists...

We will learn what illustration is, how art can have a range of purposes and develop our painting skills. We will compare work different mediums.
