

Autumn in Year 1 & 2

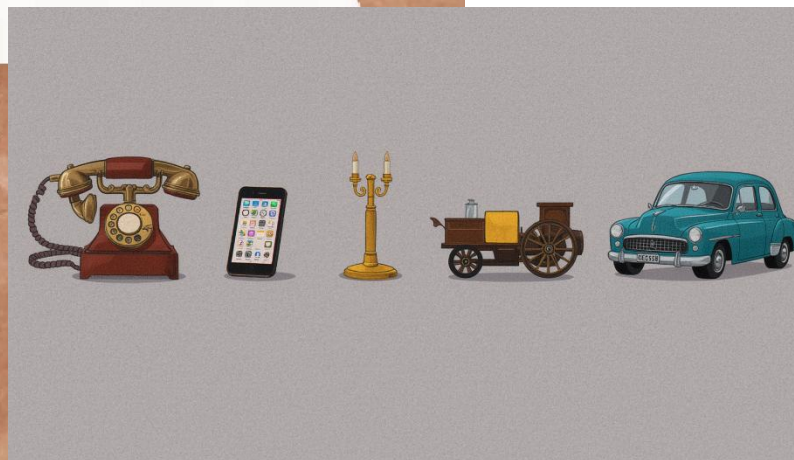

Our Autumn Topic Changes in Technology

As geographers...

KSI will explore their school grounds, naming and describing what they see and how these areas are used. Children will devise simple maps, including map symbols to represent their observations. Children will learn about compasses and the simple use of directional language.

As historians...

In this unit, the children will look at the changes in technology within living memory. The children will begin by thinking about the term 'technology' and what that means and consider the technology that they use in their everyday lives.

Trips

We will be participating in a drama workshop to spark imagination and boost our narrative writing. We will also be going on a local walk around our school community to bring our geography topic to life through fieldwork.

As scientists...

This term we will be exploring the human body. We will be learning to label different body parts and discovering how our five senses help us to explore the world. We will also investigate how exercise, good hygiene and looking after our teeth help keep us healthy and strong.

As individuals and part of society...

We will be learning to identify our emotions using the Zones of Regulation. We will also work on Understanding kindness, respect, boundaries and safe relationships.

As athletes...

We will be exploring multisport as well as focusing on footwork and balance.

As theologians...

We will explore why churches and cathedrals are considered to be important places for Christians. We will also explore how Christians express their beliefs and worldviews in different artistic ways.

As musicians...

We will learn to move in time with the beat/pulse, responding to different tempos. We will chant, rap and sing using different voices, following simple cues such as starting together.

As computer technicians...

We will explore data and information by learning how to label, group, and search for content.

As artists...

We will use clay and learn what sculpture is and its purpose. We will develop skills with clay as a creative material.
